EDUCATION

JNTUK University College of Engineering, Vizianagaram

B.Tech in Information Technology

2016 - 2020

PROFESSIONAL EXPERIENCE

Sails Software Developer | Senior Software Developer

May 2020 – Present

Funcon | *React, Django, GCP, PostgreSQL*

- Led the team as a proactive bridge between clients and the organization, ensuring clear communication and alignment of goals.
- Managed meeting organization and coordination across teams using the Google Calendar API, facilitating seamless scheduling and collaboration for sharing ideas.
- Integrated OpenAI to enhance meeting descriptions and suggest topics prior to meeting creation, improving planning and content relevance.
- Developed scheduled tasks to generate reports, track active participants, and assign attendees to meetings based on previous interests and collaborations, ensuring diverse perspectives in each discussion.
- Optimized GCP architecture to reduce costs and enhance app performance, improving efficiency and scalability.

Logbox | *React.js, Redux, Laravel, AWS Lambda*

- Led the frontend developer team in India to optimize and maintain the app, while collaborating with client counterparts in UK
- Integrated payment processing and created scheduled jobs for collections using Acquired API
- Designed a bootstrap Credit Reporting Application and admin panel for customer support teams using React and Laravel
- Developed standardized design library for uniformity across various apps

Nooli | *Apollo-GraphQL, AWS Lambda, React Native, Nodejs*

- Architected entire application and integrated Chargebee for subscription management
- Developed an in-house Content Management System for the marketing team
- Handled complex data in the mobile app to display puzzles and questionnaires
- Used Lambda functions to manage quizzes based on customer responses and interests

Cochab | *React Native, Nodejs, Google Firestore, Stripe, VideoSDK*

- Integrated Stripe to facilitate payments from students to tutors
- Utilized VideoSDK to enable live video streaming for tutors and students
- Leveraged Google Firestore to enable server-less API calls to optimize

Revvity | *.NET, Core PHP, Javascript.*

- Fixed codebase vulnerabilities based on identified securities issues
- Delivered project within 50% of the allotted timeline (1.5 month vs 3-months); resulting in receiving 3 additional long-term projects

OPEN SOURCE CONTRIBUTIONS

Developed [vite-react-router-dom](#) for automatic route creation in Vite. Monthly Downloads: 100(approx)

Created [react-router-light](#), a lightweight React Router. Monthly Downloads: 50(approx)

Contributed to various GitHub projects (GitHub).

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP, C#, HTML/CSS

Frameworks: Nodejs, React.js, React Native, Django, Laravel, .NET

Developer Tools: Docker, Kubernetes, AWS, GCP, Firestore, Postgres, MySQL
